Abstract of JP9278047

PROBLEM TO BE SOLVED: To house a small bag of a seasoning containing a sauce or a mixed sauce, etc., and a small bag for spices separately from a food, and in addition, prevent a positional slip from generating between respective small bags and a content (food).

SOLUTION: This lid 12 made of a transparent material is fitted in the opening edge 11a of a container main body 11 which constitutes a food packaging container 10 to house a food 20 such as a fried noodle, Chinese noodle and spaghetti, and protects the food 20 in the container main body 11. On the upper surface 12a of the lid 12, a housing recess 13 for the housing of spices and seasonings for the food 20, is formed, and at the same time, on the bottom of the housing recess 13, a corrugated non-slip 14 is formed.
